

What to Expect When Getting the COVID-19 Vaccine

Even if you've had COVID-19, it is important to get the vaccine.

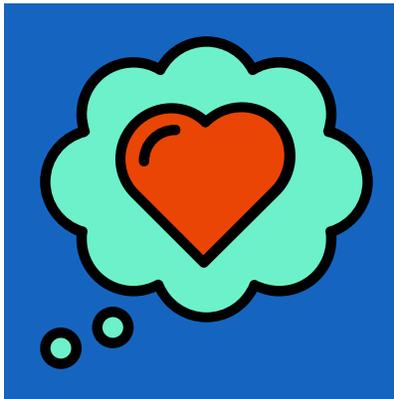

It's free for most everyone, including immigrants. No ID is required to get the vaccine.

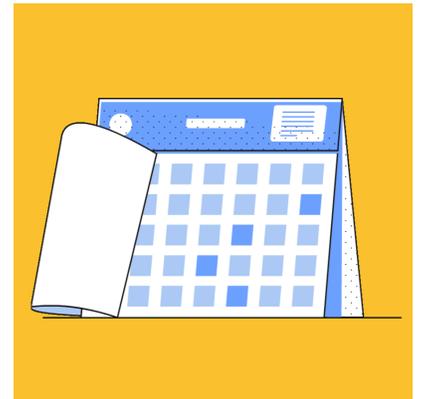

There are several COVID-19 vaccines. Some require a 2nd dose. All are safe and effective.

You may have a sore arm, headache, fever or chills after receiving the vaccine.

You will start to feel better after a couple of days.

It takes several weeks before the vaccine protects you.

Continue to wear a mask, wash your hands, and maintain your distance.
