

MIGRANT CLINICIANS NETWORK

# MCN 2022 Impact Report

## A Force for Health Justice

Migrant Clinicians Network, a 501(c)3 nonprofit, pushes back against health inequities and structural racism to help migrants, immigrants, and asylum seekers access quality care when they need it. In 2022, we expanded our efforts, equipping more clinicians than ever with tools, knowledge, and resources to serve those who have been economically and socially marginalized, and working diligently with individuals in these under-resourced communities to give them access to health knowledge, health care, and support services, so they have the opportunity to be healthy and safe.

## Education, Analytics, and Language Access

MCN's popular learning opportunities for health care workers saw increased attendance last year with over **3,660** participants at webinars/trainings.

This growth prompted us to **expand our data & analytics team** so we could improve our evaluations and better meet the rapidly changing needs of the

**1,611** organizations in contact with MCN.

We added a **full-time Spanish translator** to the team to improve language access and ensure our materials are culturally competent. In the last year, we've created and updated more than

**100** newly translated resources/webpages.

## Environmental Justice and the Climate Crisis

MCN trainings on the climate crisis, community mobilization, and disaster preparedness reached **1,135** workers, clinicians, and Community Health Workers.

Our train-the-trainer project provided worker health and safety training to

**25** trainers who then reached **639** workers

MCN's environmental education curriculum improved Puerto Rican communities' ability to respond to a changing climate, training

**14** community leaders and educators who then engaged with **160** students in Puerto Rico

## Connecting Patients with Essential Care

MCN's [Health Network](#) (HN) offers virtual case management for mobile patients as they navigate the immigration and health care systems. A record number of arrivals at the U.S.-Mexico border in 2022 has increased the need for our work with

**1,216** patients enrolled in Health Network.

Our [Humanitarian Care Network](#) connects pregnant people arriving at the border with prenatal care and ensures they can continue treatment on their way to their destination.

**84%** of those enrolled in HN required prenatal care.

## Supporting the Health and Well-Being of Clinicians

MCN's [Witness to Witness](#) program creates resources focused on clinician well-being, like [We Do Hope](#), a podcast on moral injury, chronic sorrow and more.

We also published [Helping the Helpers](#), a comic book with strategies to counter toxic stress and promote self-compassion.

## Community Engagement and Outreach

The [Ventanillas de Salud](#) Austin, Eagle Pass and Del Rio, Texas, supported the health of their communities with

**40,112** vaccines distributed & **1,748** health services provided.

MCN's [Photovoice Project](#) linked a photographer with communities.

**25** Latinx stories were shared in their communities.

## Advocacy

Our advocacy efforts include:

- ✓ Heat and Pesticide Safety Policies
- ✓ Worker Protection from COVID
- ✓ Pregnant Asylum Seeker Health Access
- ✓ Language Justice
- ✓ Overtime Pay for Farmworkers

## Thank you!

We rely on our donors to propel our work forward. We were recognized by philanthropist MacKenzie Scott with a gift of \$5 million, the largest in our history! Donate to MCN to make a big impact in health justice.

**Thank you for your support**
