Prevent falls
Always use 3 points of contact when getting on and off machinery.

Power take-offs or PTOs are dangerous
Walk around PTOs, never jump over them. Don’t wear loose clothing or draw strings near PTOs.

Protect your co-workers
Always look back when backing up. Do not permit others to ride.

Seatbelts save lives
Always use a seatbelt on tractors and skid steers with rollover protection or ROPs.

Prevent hearing loss
Wear hearing protection when working with noisy machinery.
